

# Lunedì 10 Marzo, ore 9.00 - 13.30

## Istituto "Gentileschi" - Via Natta, 11 - Milano

- **Competences: some integrated solutions to a seemingly complex area**  
**Sara Galvin.** We have been using the word *competences* in recent years to denote quite a number of general and language learning skills. It is a term that is used at both a formal and an informal level. This talk focuses on where we are in terms of competences and how we can easily integrate them into our language teaching.
- **Learning Disabilities at school**  
**Giulia Lampugnani.**  
Teacher, Special Educational Needs Teacher Trainer, COOP Soc. Talenti fra le nuove Onlus- LEND
- **Computing is a Life Skill**  
**Damien Lonsdale.** We are all familiar with the 4Cs in language learning: creativity, collaboration, critical thinking and communication skills. How about including a fifth 'C' for computing? This session aims at showing how students can learn English by taking advantage of the latest digital offerings, such as the Online Workbook.
- **1+1 doesn't always equal 2**  
**Jonathan Coxall.** A short talk on how to promote speaking activities that really get students talking. Teaching students can seem frustratingly slow and difficult! In this session we will look at a series of activities which encourage fluency.
- **Exploring Life Skills**  
**Steve Taylore-Knowles.** This session will answer all questions about life skills. What are life skills? Why are they important? How do we bring them into our classrooms? Using concrete examples, I'll explain how you can not only teach your students English, but help them to use their English to become more effective in their professional, academic and social lives.

*Sessioni di aggiornamento pedagogico per i docenti della scuola secondaria con rilascio di un certificato di esonero ministeriale riconosciuto.*
